F: Ordre de montage
I: Ordine di assemblaggio

Schakel het toestel uit door middel van de hoofdschakelaar.
Switch off the device by means of the main switch.
Schalten Sie das Gerät am Hauptschalter aus.
Éteignez l'appareil avec l'interrupteur principal.
Spegner il dispositivo con l'interruttore principale.

Boor een gat van ø6 mm in het midden van de schroefdraadaansluiting A.
Drill a ø6mm hole in the center of the threaded connection A.
Bohren Sie ein ø6mm Loch in die Mitte der Gewindeanschluß A.
Percez un trou de ø6 mm au centre du raccord fileté A.
Praticare un foro di ø6mm nel centro della connessione filettata A.

Monteer de thermische zekering.
Install the thermal fuse.
Installieren Sie die Thermosicherung.
Installez le fusible thermique.
Installare il fusibile termico.

Bedrading/Wiring/Verdrahtung/Câblage/Cablaggio

Sluit de kabel van de thermische zekering B-C aan tussen de bovenste aansluiting (2) van de drukschakelaar en de kabelboom van de ketel A. Sluit het andere uiteinde van de kabel aan op de thermische zekering D.

Connect the thermal fuse cable B-C between the top connection (2) of the pressure switch and the boiler cable loom A. Connect the other end of the cable to the thermal fuse D.

Schließen Sie das Thermosicherungskabel B-C zwischen dem oberen Anschluss (2) des Druckschalters und dem Kabel von ACP A an. Schließen Sie das andere Ende des Kabels an die Thermosicherung D an.

Connectez le câble du fusible thermique B-C entre la connexion supérieure (2) du pressostat et le faisceau de câbles de la chaudière A. Connectez l'autre extrémité du câble au fusible thermique D.

Collegare il cavo del termofusibile B-C tra il collegamento superiore (2) del pressostato e il cablaggio del cavo della caldaia A. Collegare l'altra estremità del cavo al termofusibile D.
